AB - JP2000313796 NOVELTY - Resin composition includes an unsaturated polyester resin containing an unsaturated polyester, as essential component, having dicyclopentenyl group in its skeleton, and an N-oxyl compound as a polymerization inhibitor.

- USE - The composition is useful for producing drawing molded products.

- ADVANTAGE - The resin composition exhibits long storage stability and excellent drawing moldability and workability, and the resulting molded products have excellent toughness and durability.
